

# Field Walk + Planned Grazing Q&A with Graeme Hand

Join us with Graeme Hand for an afternoon of sharing and learning on planned grazing for improved landscape function.

**A key focus of this session will be Q&A for participants, so please bring plenty of questions in relation to your grazing planning and management.**

The session will cover at least the following topics:

- **Farm walk** and **designing** for planned grazing – water and fencing
- Overcoming the key **barriers** to successful grazing
- **Monitoring** and **corrective actions**
- Setting up **safe-to-fail trials** to find out what works best on your land
- **Drought-proofing** - adapting grazing management to lower rainfall.

Landsmith Home Farm is an early-stage project running a high-density/long-recovery grazing program (cattle/beef), and in the process of establishing a 2 ha market garden.

**When:** Wednesday 31 July 2024

**Time:** 1pm - 4.30pm, with a short sundowner afterwards (drinks & nibbles)

**RSVP:** Michelle on 0439 093 868 or [mmcmanus@landsmithcollection.com](mailto:mmcmanus@landsmithcollection.com)

**Where:**

Landsmith Home Farm

9834 Bussell Hwy, Margaret River

*Graeme's journey with grazing management spans over 30 years, training with Allan Savory in the mid-90s and devoting his career to understanding how to make grazing management successful and restorative.*

This workshop will suit you whether you are just getting started, or have grasped some of the fundamentals and looking to connect with other land managers on the same journey.
